

The Growing Complexity of Global Cybersecurity

# THE OST INFINITY

Contextual & Systematic Thinking company

AIOps | Machine Learning

# Vision and Trends

## Our Vision: Contextual & Systematic Thinking

Ost Infinity's vision is to bring contextual and systematic cyber security solution for all.

## Escalation complexity of global cyber threats

Our Products and Services is designed and developed in a multi-layered, adaptive, and collaborative approach to mitigate evolving threats. A proactive, adaptive, and globally coordinated AI-Powered defence to countering the escalating complexity of cyber threats.

## Ost Infinity's Digital Transformation

ViXa Identity-First platform AI-driven defence, specialised workforce, and regulatory enforcement escalating digital transformation to counter the complexity of global cyber threats. We continuous innovation and collaboration as we defining the future cybersecurity resilience.

# Stepping through our historic journey, we arrive at our recent success.

Over time we have expanded and reinvented ourselves to become a global brand with a diversified business portfolio. Our new growth drivers are now showing strong momentum for the future.

## Business Modules

We have future-proofed our business model for upcoming trends in the industry with a service-led transformation. Riding on the success in our own software development and Digital Transformation, we have developed three business modules:

- 01 ViXa Platform -  
Managed Threat Detection  
and Response**
- 02 ViXa Platform -  
Network Performance  
Monitoring & Observability**
- 03 ViXa Platform -  
Managed Security Services**

We strive to fulfill customer's Cybersecurity and IT Operation needs in every stages of their lifecycle.

## Sustainability

We have also embraced sustainability as part of our larger strategic efforts, focusing on initiatives that will build a brighter future for our people and clients.

We are committed to a vision of net-zero by 2050.

The logo for Great Place To Work, featuring the text "Great Place To Work" in white, stacked vertically, with a registered trademark symbol (®) at the end of "Work". The text is centered within a red square, which is itself centered within a larger light blue square.

## Introduction

# Ost Infinity Brief

## Ost Infinity Contextual & Systematic Thinking

Developing the Digital Foundation of Well-Run Societies. As societies grow and evolve, digital solutions play an increasingly vital role in fostering efficiency, growth, and welfare. At Ost Infinity, we develop cybersecurity software and IT operation solutions designed to solve **the Growing Complexity of Global Cyber Threats** meet every aspect of the changing digital cyber threats and needs of modern societies and organizations.

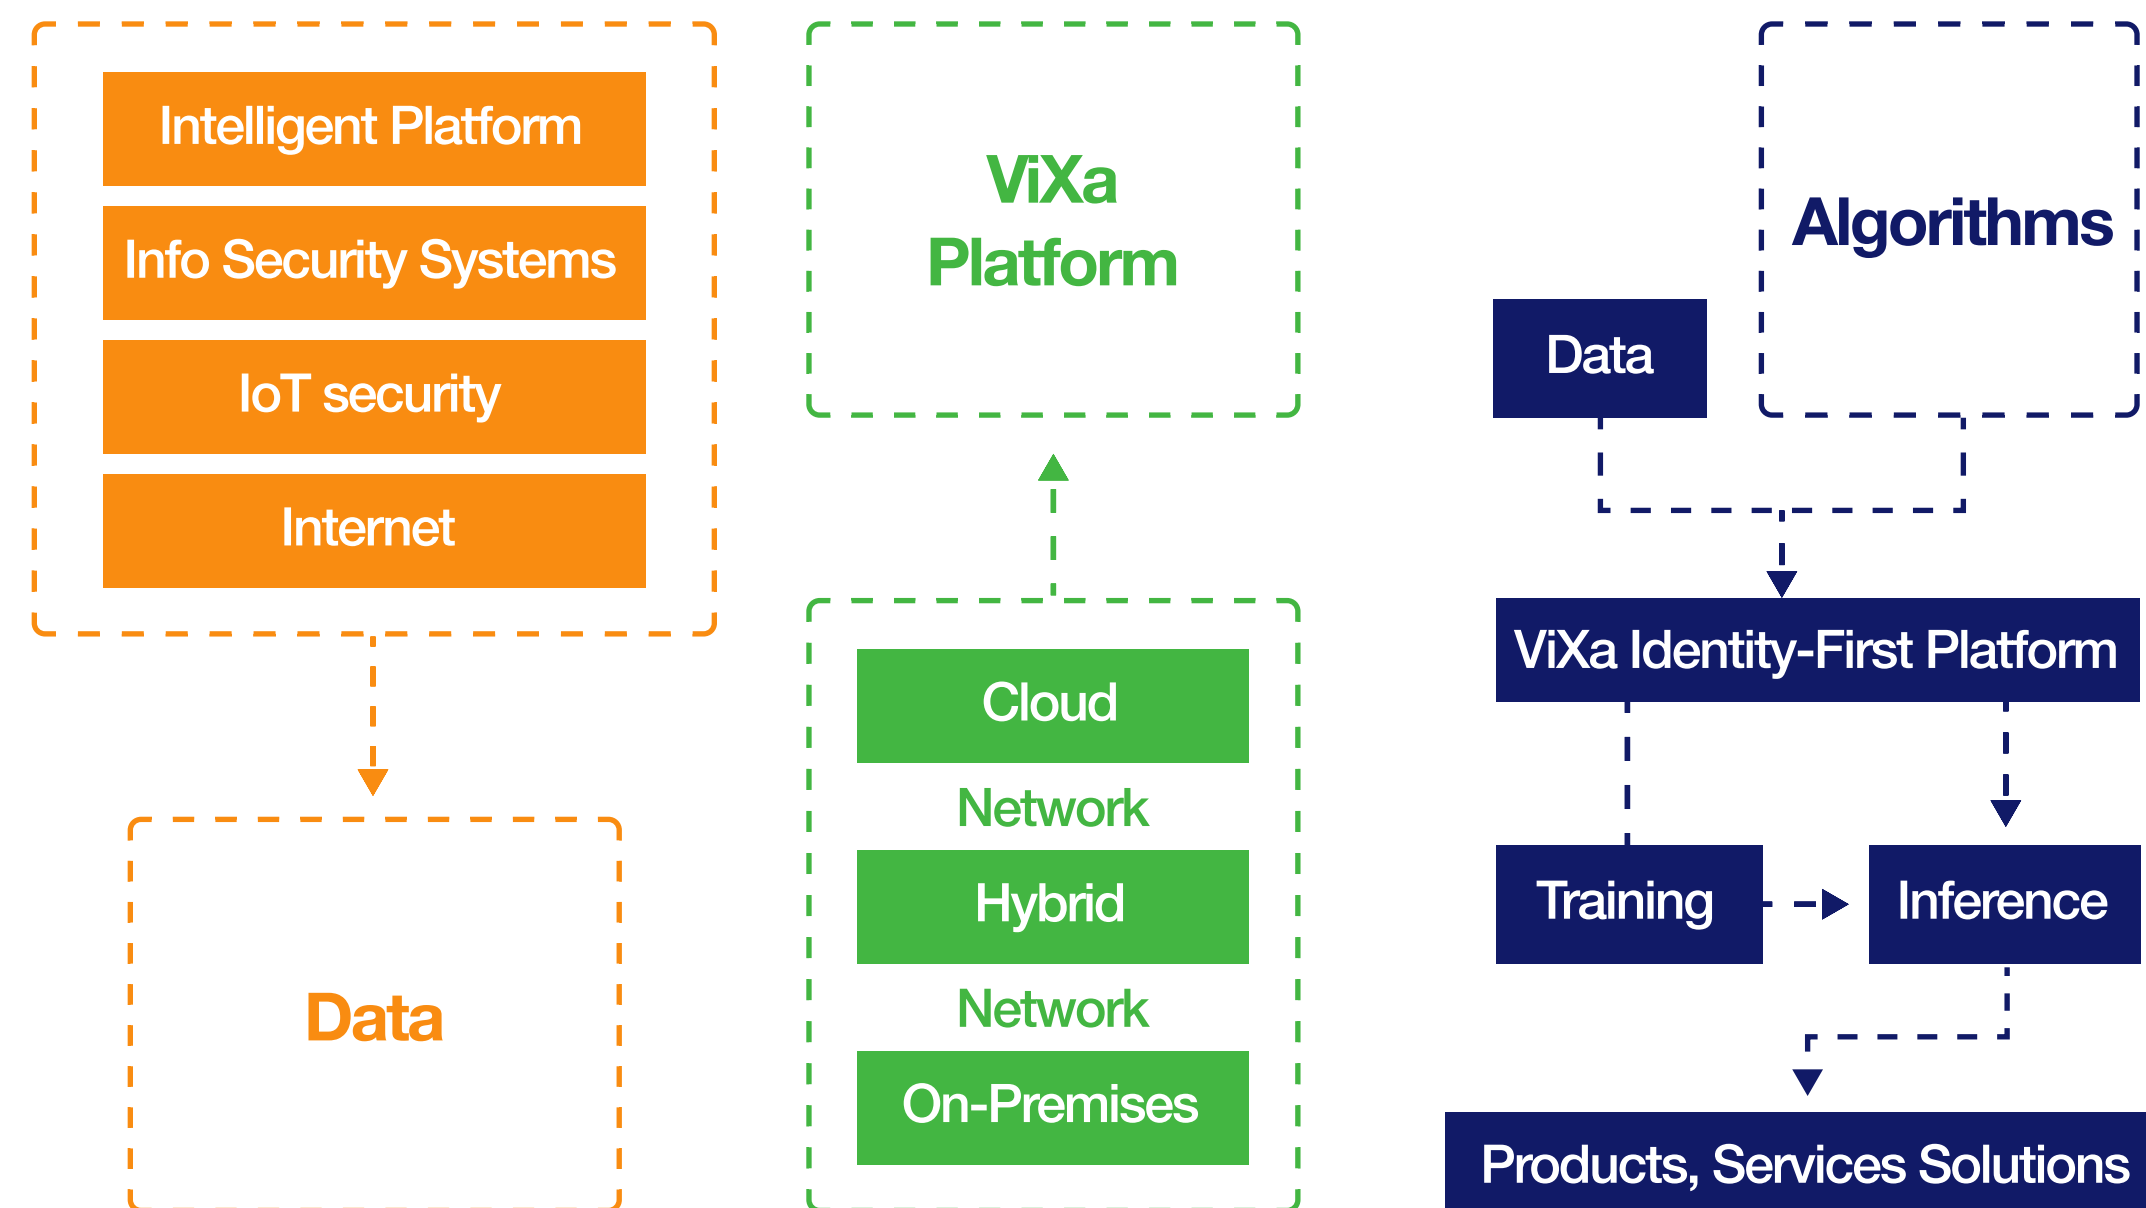

Since 2024, our contributions to Germany and the European Union and APAC societies have helped shape one of the most modern and progressive public sectors in the world. As the leading supplier of Managed Threat Detection and Response and Network Performance Monitoring and Observability, we create flexible, creative, and innovative cybersecurity solutions that empower and impact decision-makers, users, and citizens.

# Milestones

We have maintained a consistent track record of accelerating, development, transformation & growth

# Multi-year investment enables multiple pockets of strength...

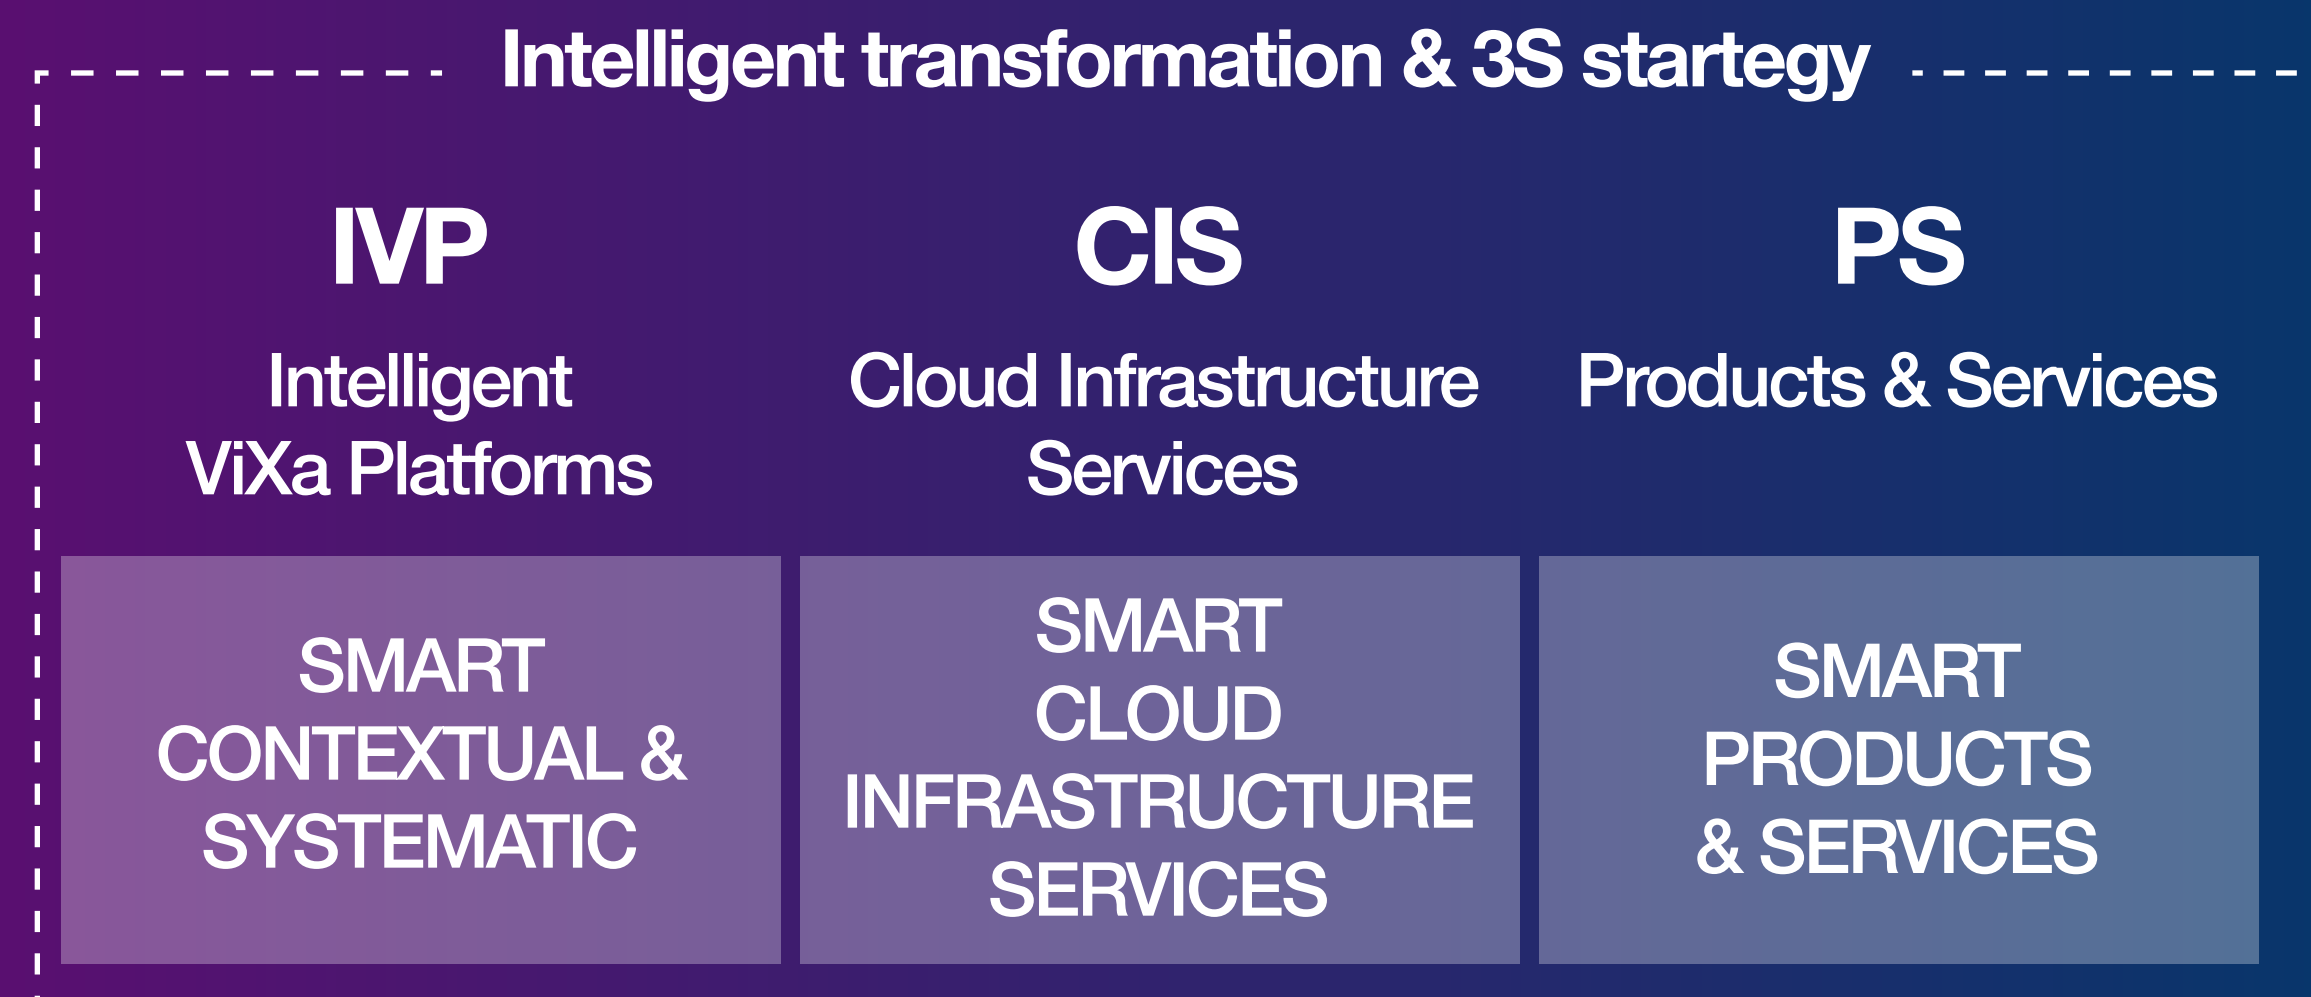

## ... beyond just platform to services & solutions

Maximize the value of **Ost Infinity**

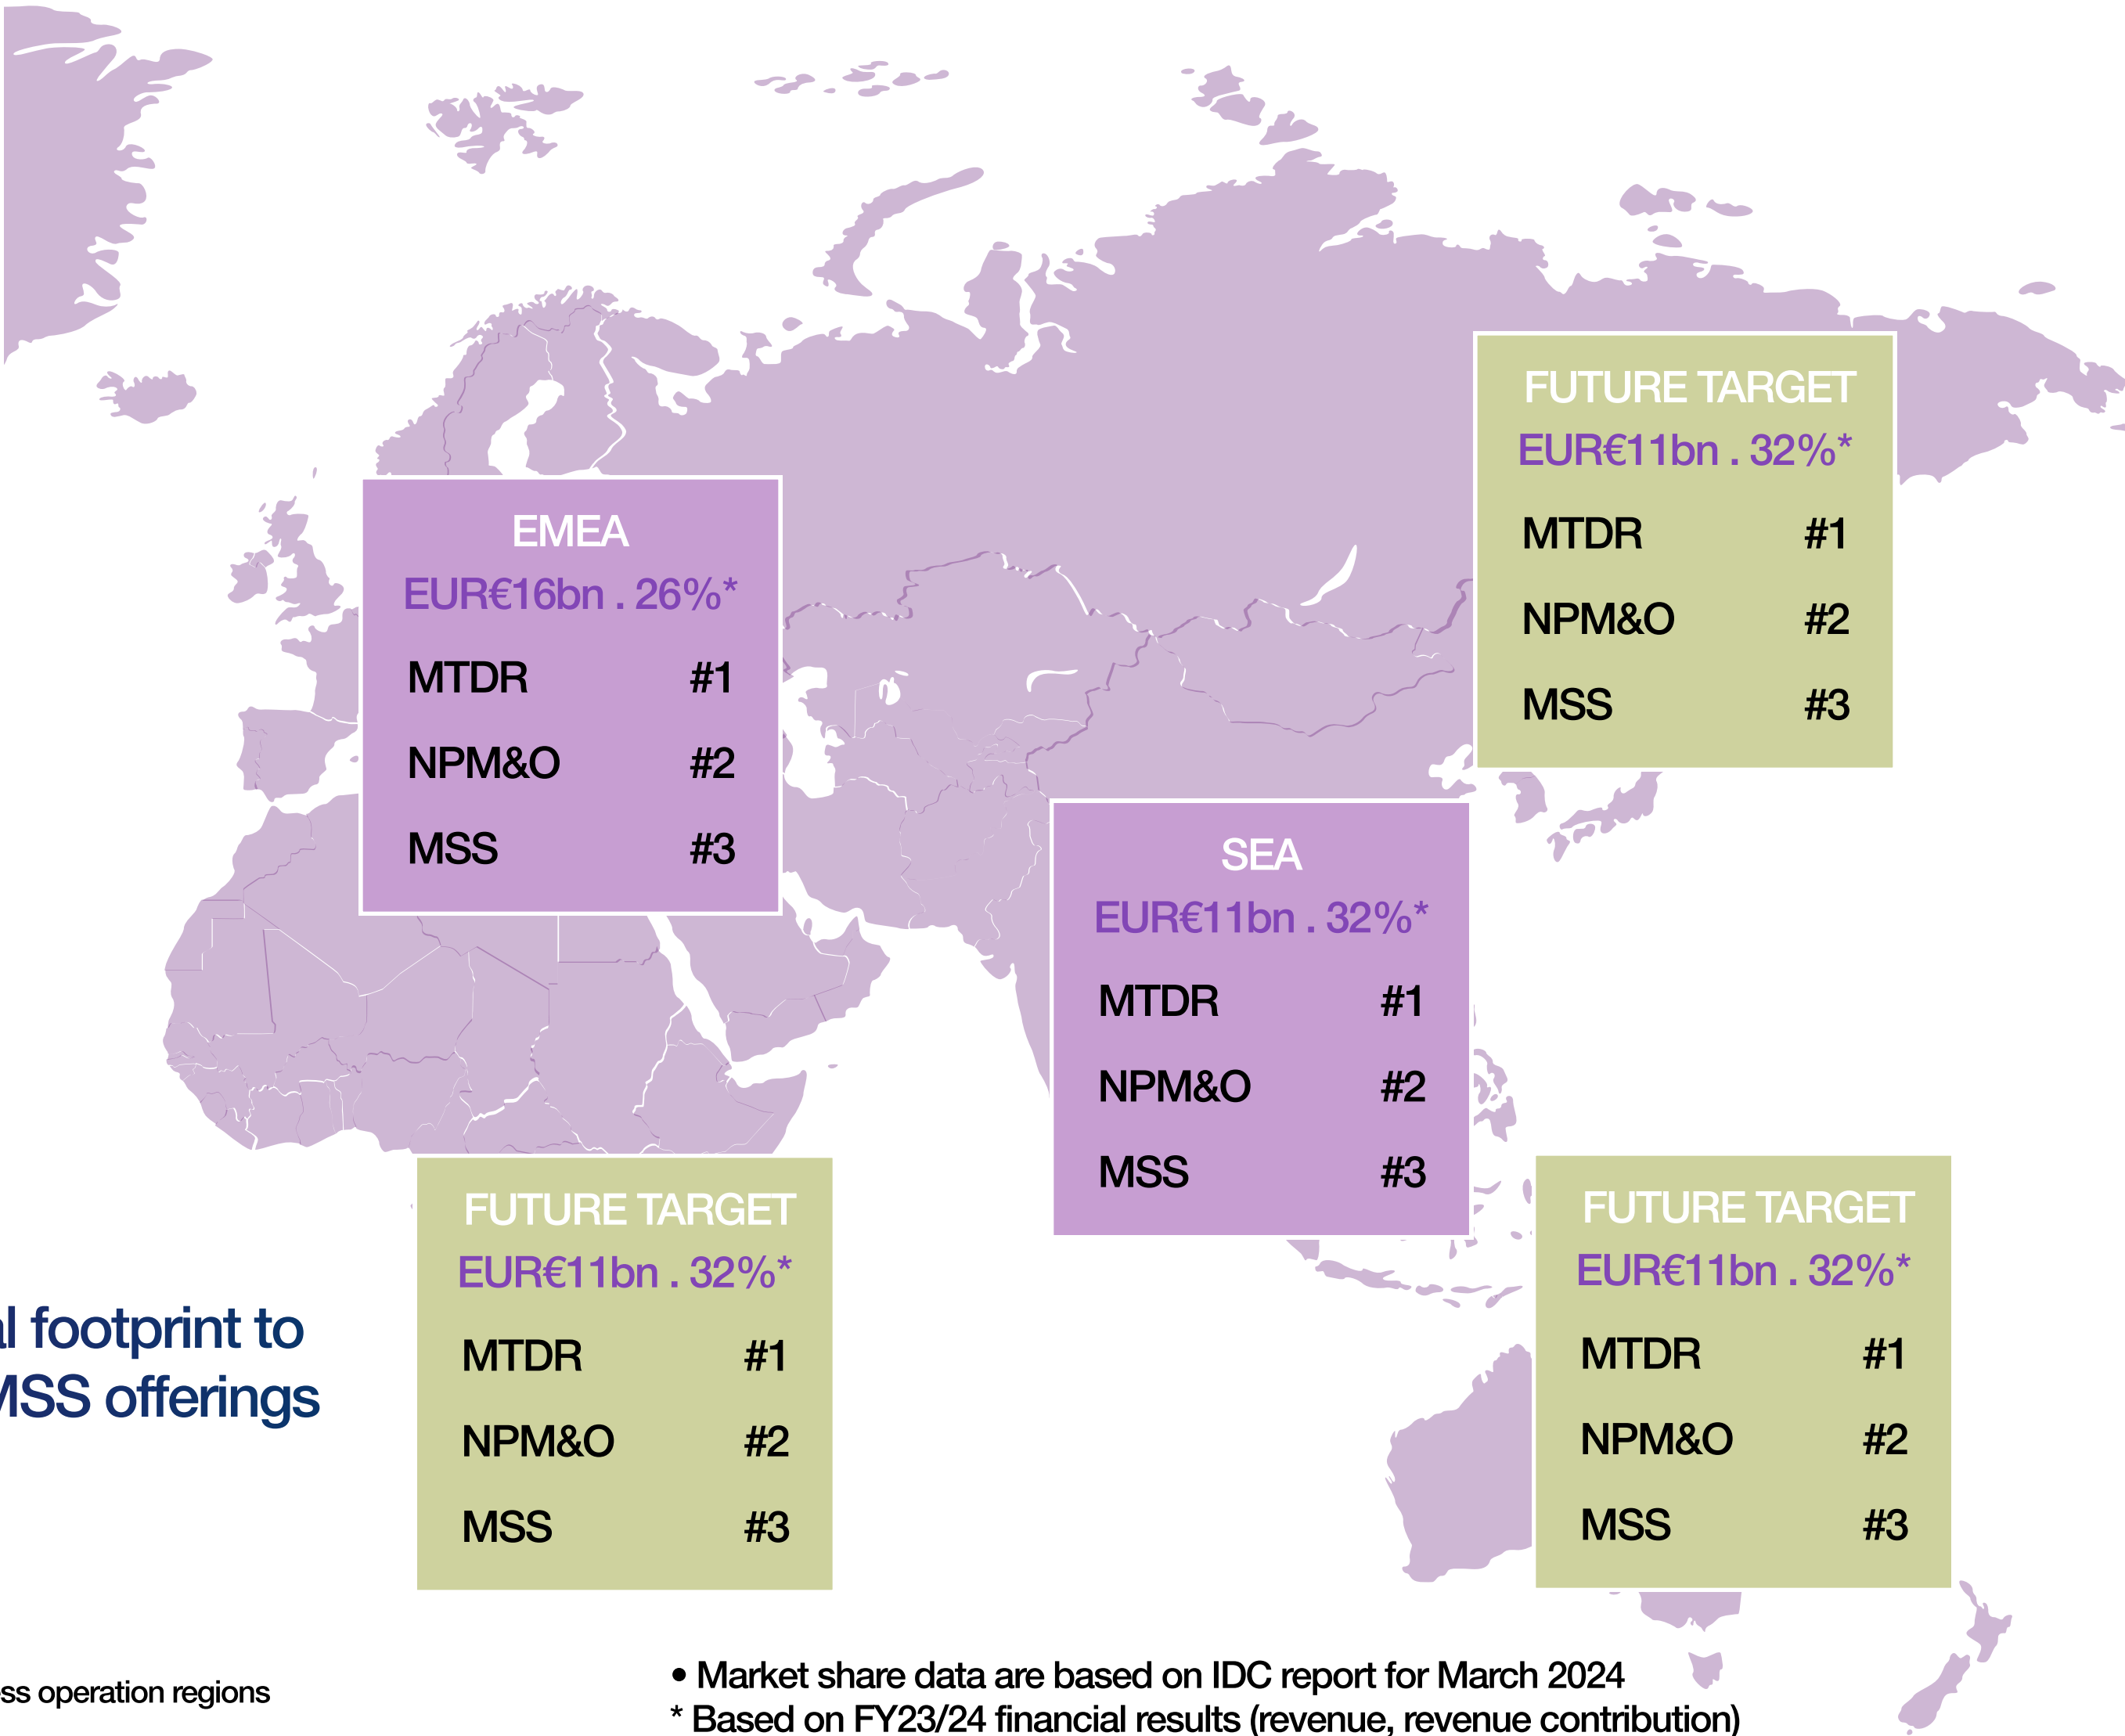

**Operational Excellence & Hybrid Development**

**Technology Investments**

# Our global business has diversified its efforts to maximize regional success

- ✓ Ost Infinity creates cross-selling synergies from IP, IS and PSMSS
- ✓ One-platform offering all
- ✓ A truly global business, owing a leading global supply chain\*\*
- ✓ New IT portfolio: platform - cloud, hybrid, on-premises, ViXa AI, intelligence and MSS
- ✓ Leverage of the AI/ML, made in Germany, global footprint to provide comprehensive Products, Solutions & MSS offerings

Our current business operation regions

Future Target Business Opportunities  
We expecting to expand our business to these regions

- Critical Infrastructure Sectors

# Solutions Statement

Ost Infinity’s technological innovation, international cooperation, policy frameworks, and workforce development is the multi-faceted solution to growing complexity of global cybersecurity.

The Ost Infinity is building a more secure digital future in a proactive, collaborative, and adaptive approach by integrating cutting-edge technology, strong governance, global partnerships, and education.  
The key solutions Ost Infinity addressing this challenge:

## Strengthening International Cooperation

- Global Cybersecurity Treaties
- Information Sharing

## Advanced Threat Detection & AI-Powered Defence

- AI & Machine Learning
- Zero Trust Architecture (ZTA)
- Quantum-Resistant Cryptography

## Robust Regulatory & Policy Frameworks

- Mandatory Cybersecurity Standards
- Supply Chain Security
- Cyber Liability Laws

## Workforce & Education Development

- Cybersecurity Training
  - Public Awareness Campaigns
- Diversity in Cyber Talent

## Decentralized & Resilient Infrastructure

- Blockchain for Security
- Cyber Resilience Planning
  - Critical Infrastructure Protection

## Public-Private Partnerships

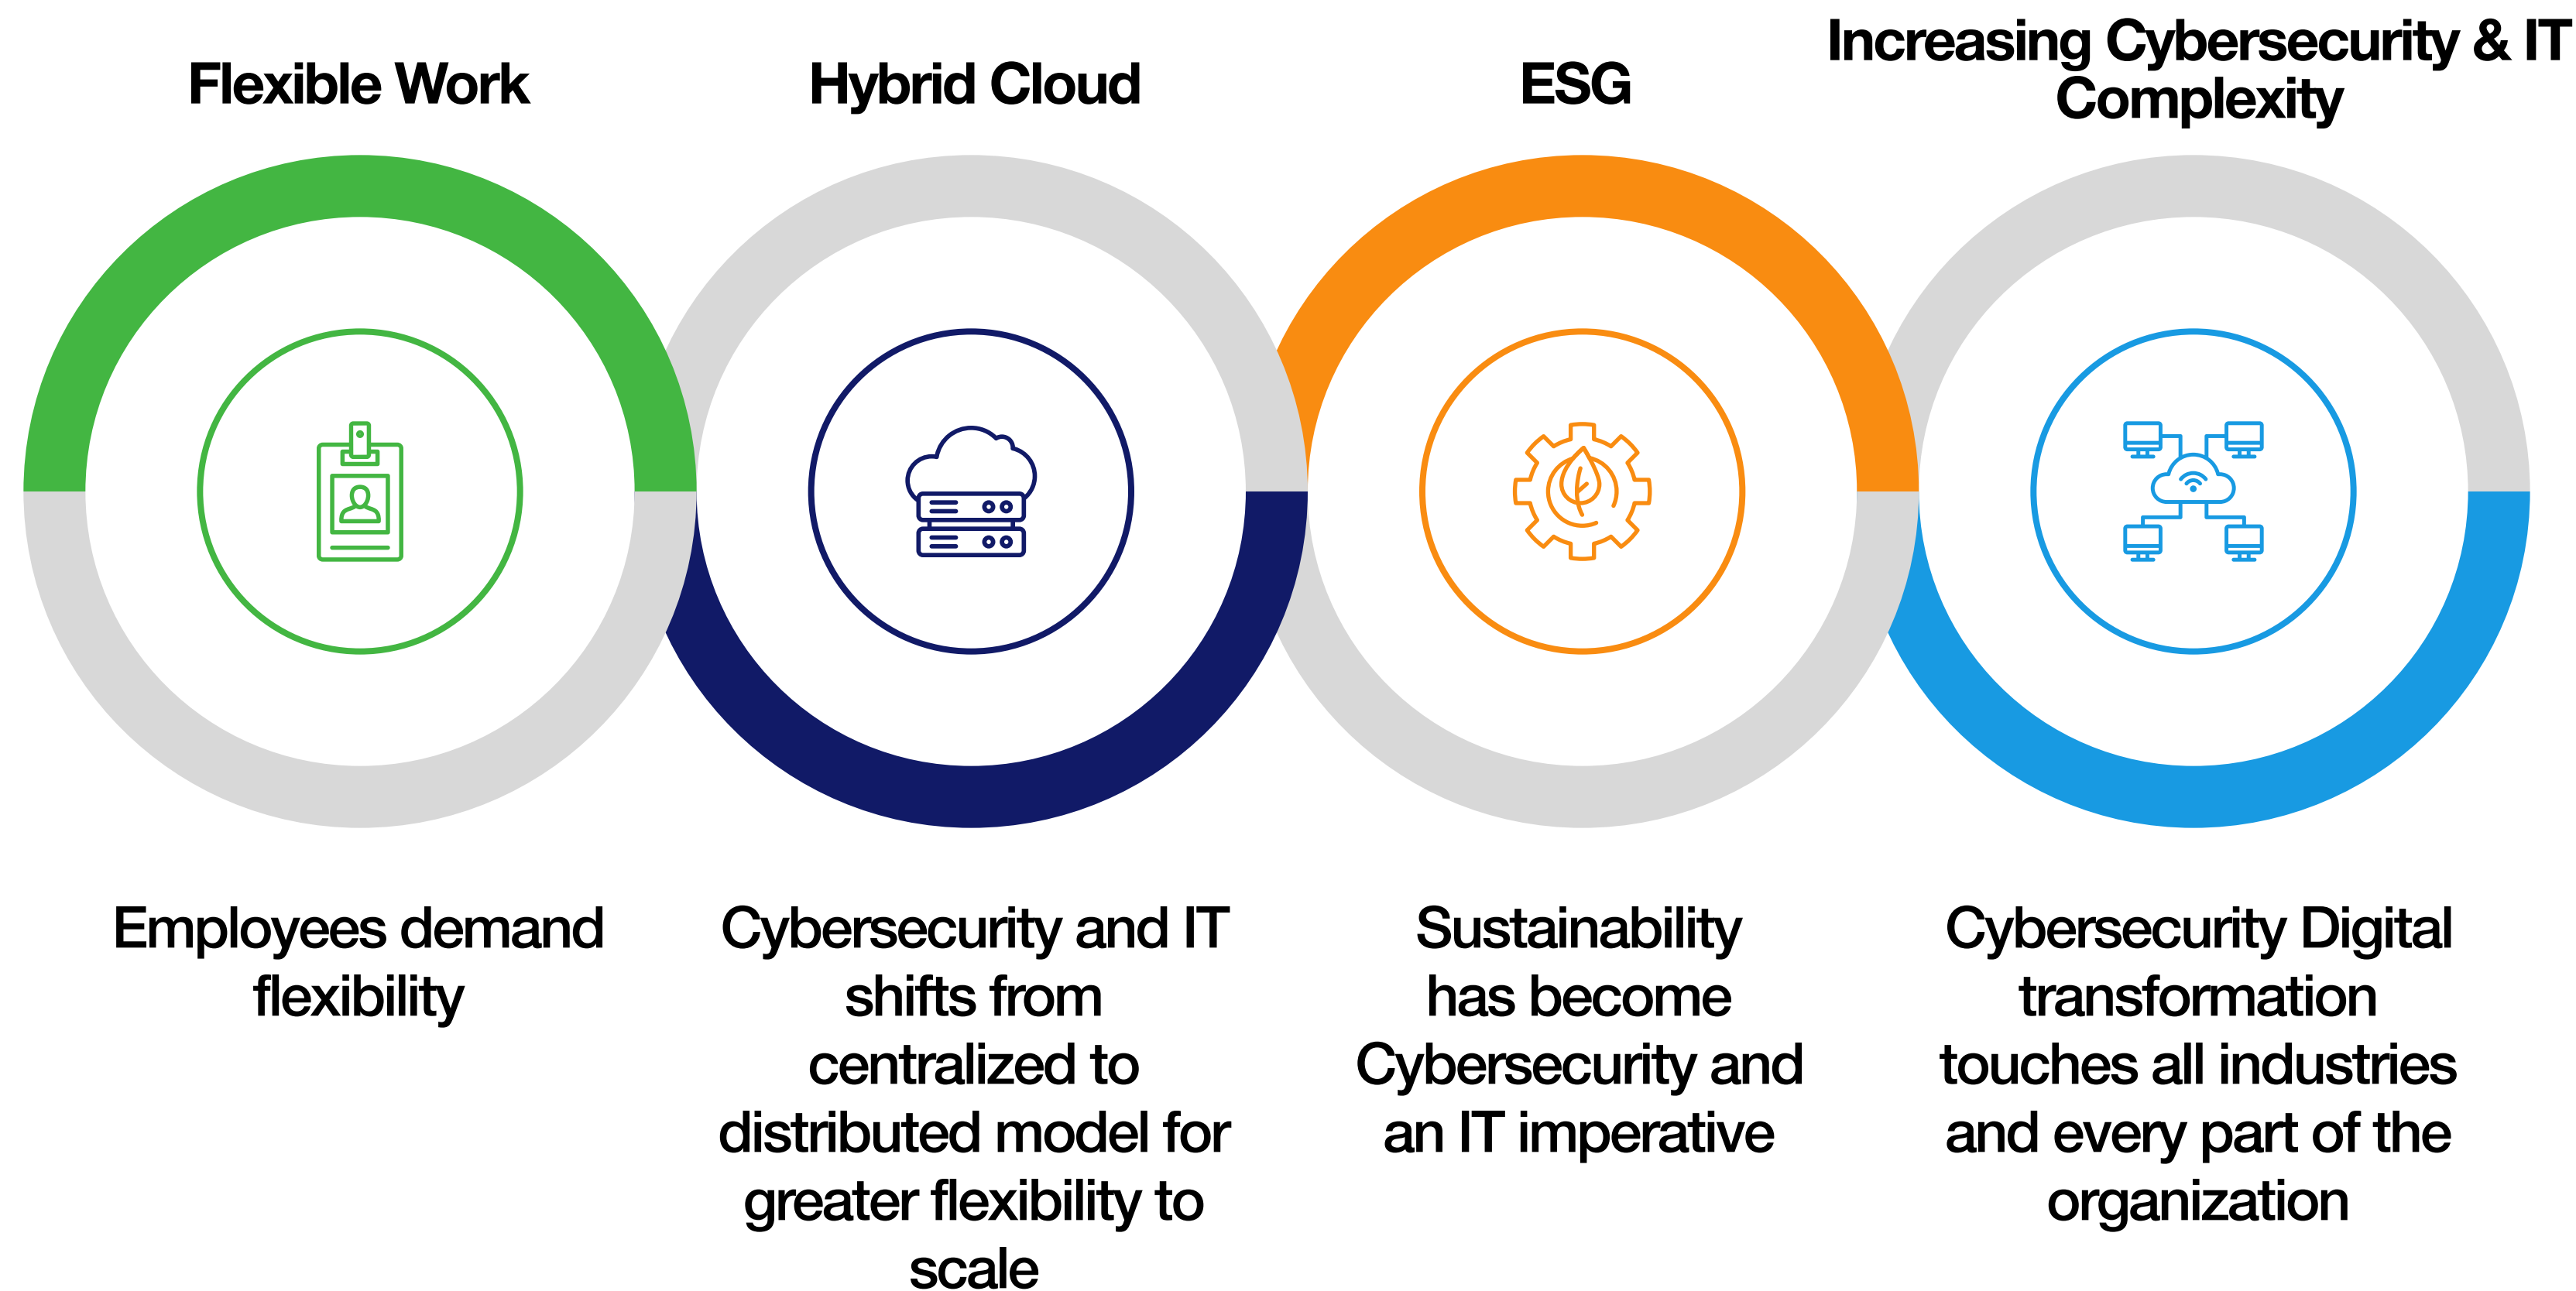

- Threat Intelligence Sharing
- Bug Bounty Programs
- Government Incentives

## Addressing Emerging Threats

- IoT & OT Security
- Deepfake & Disinformation Defence
- Ransomware Mitigation

# Cybersecurity Digital transformation shifts

Four big trends are converging and driving cybersecurity digital transformation in the enterprise

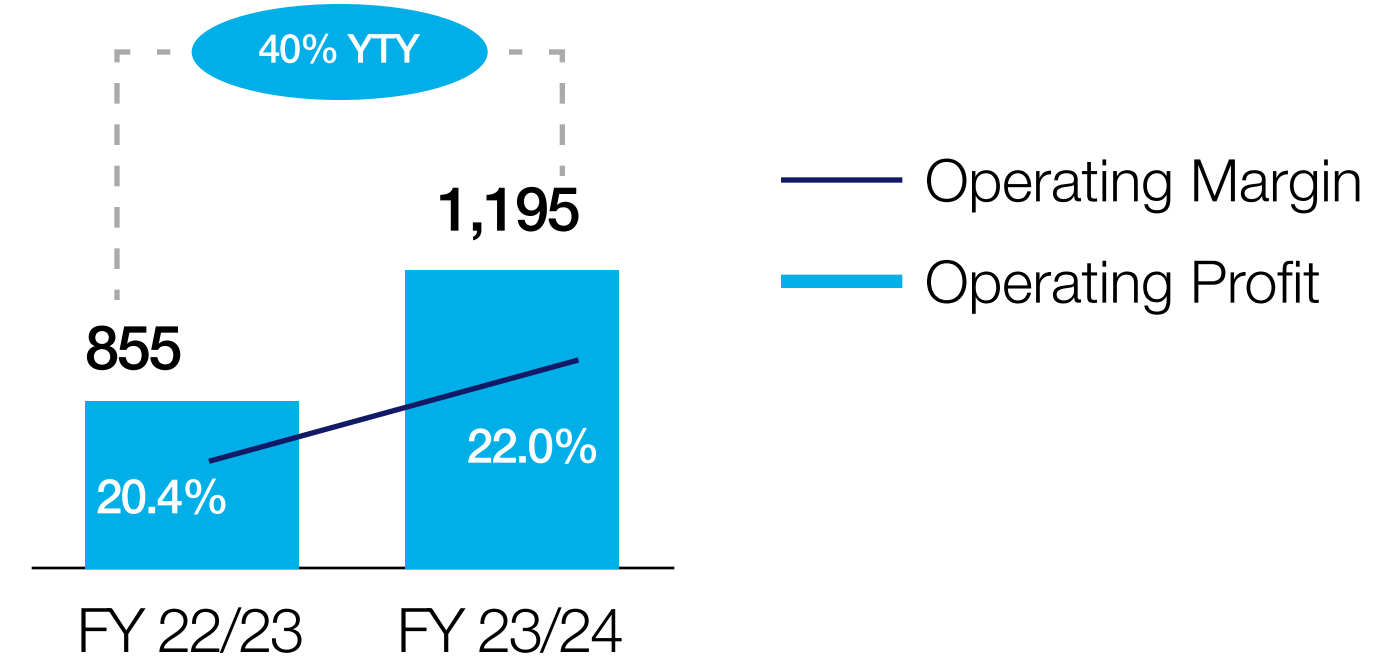

# Products & services solution architecture

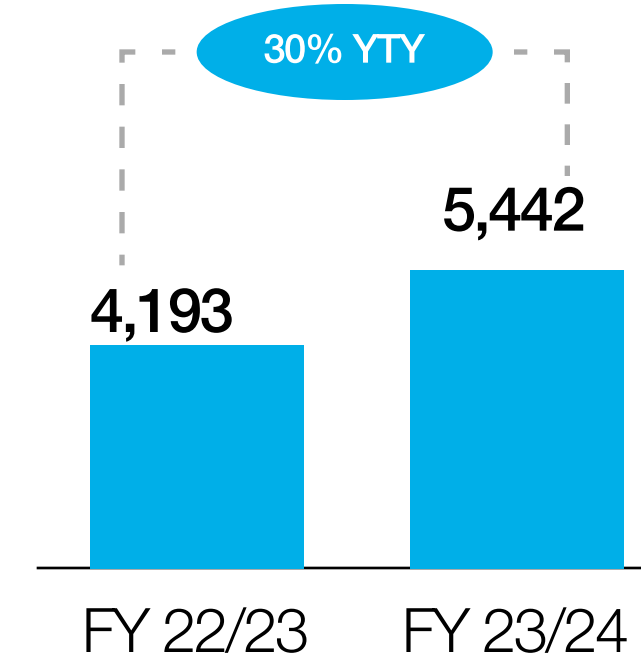

# PS financial performance

PS Operating Profit (€M)  
& Margin (%)

PS Revenue (€M)

## Three Products and Services Segments

### Support Services

- “Around-the box” services
- Grow on solid installed base, penetration increase and fast-growing value-added services

### Managed Security Services

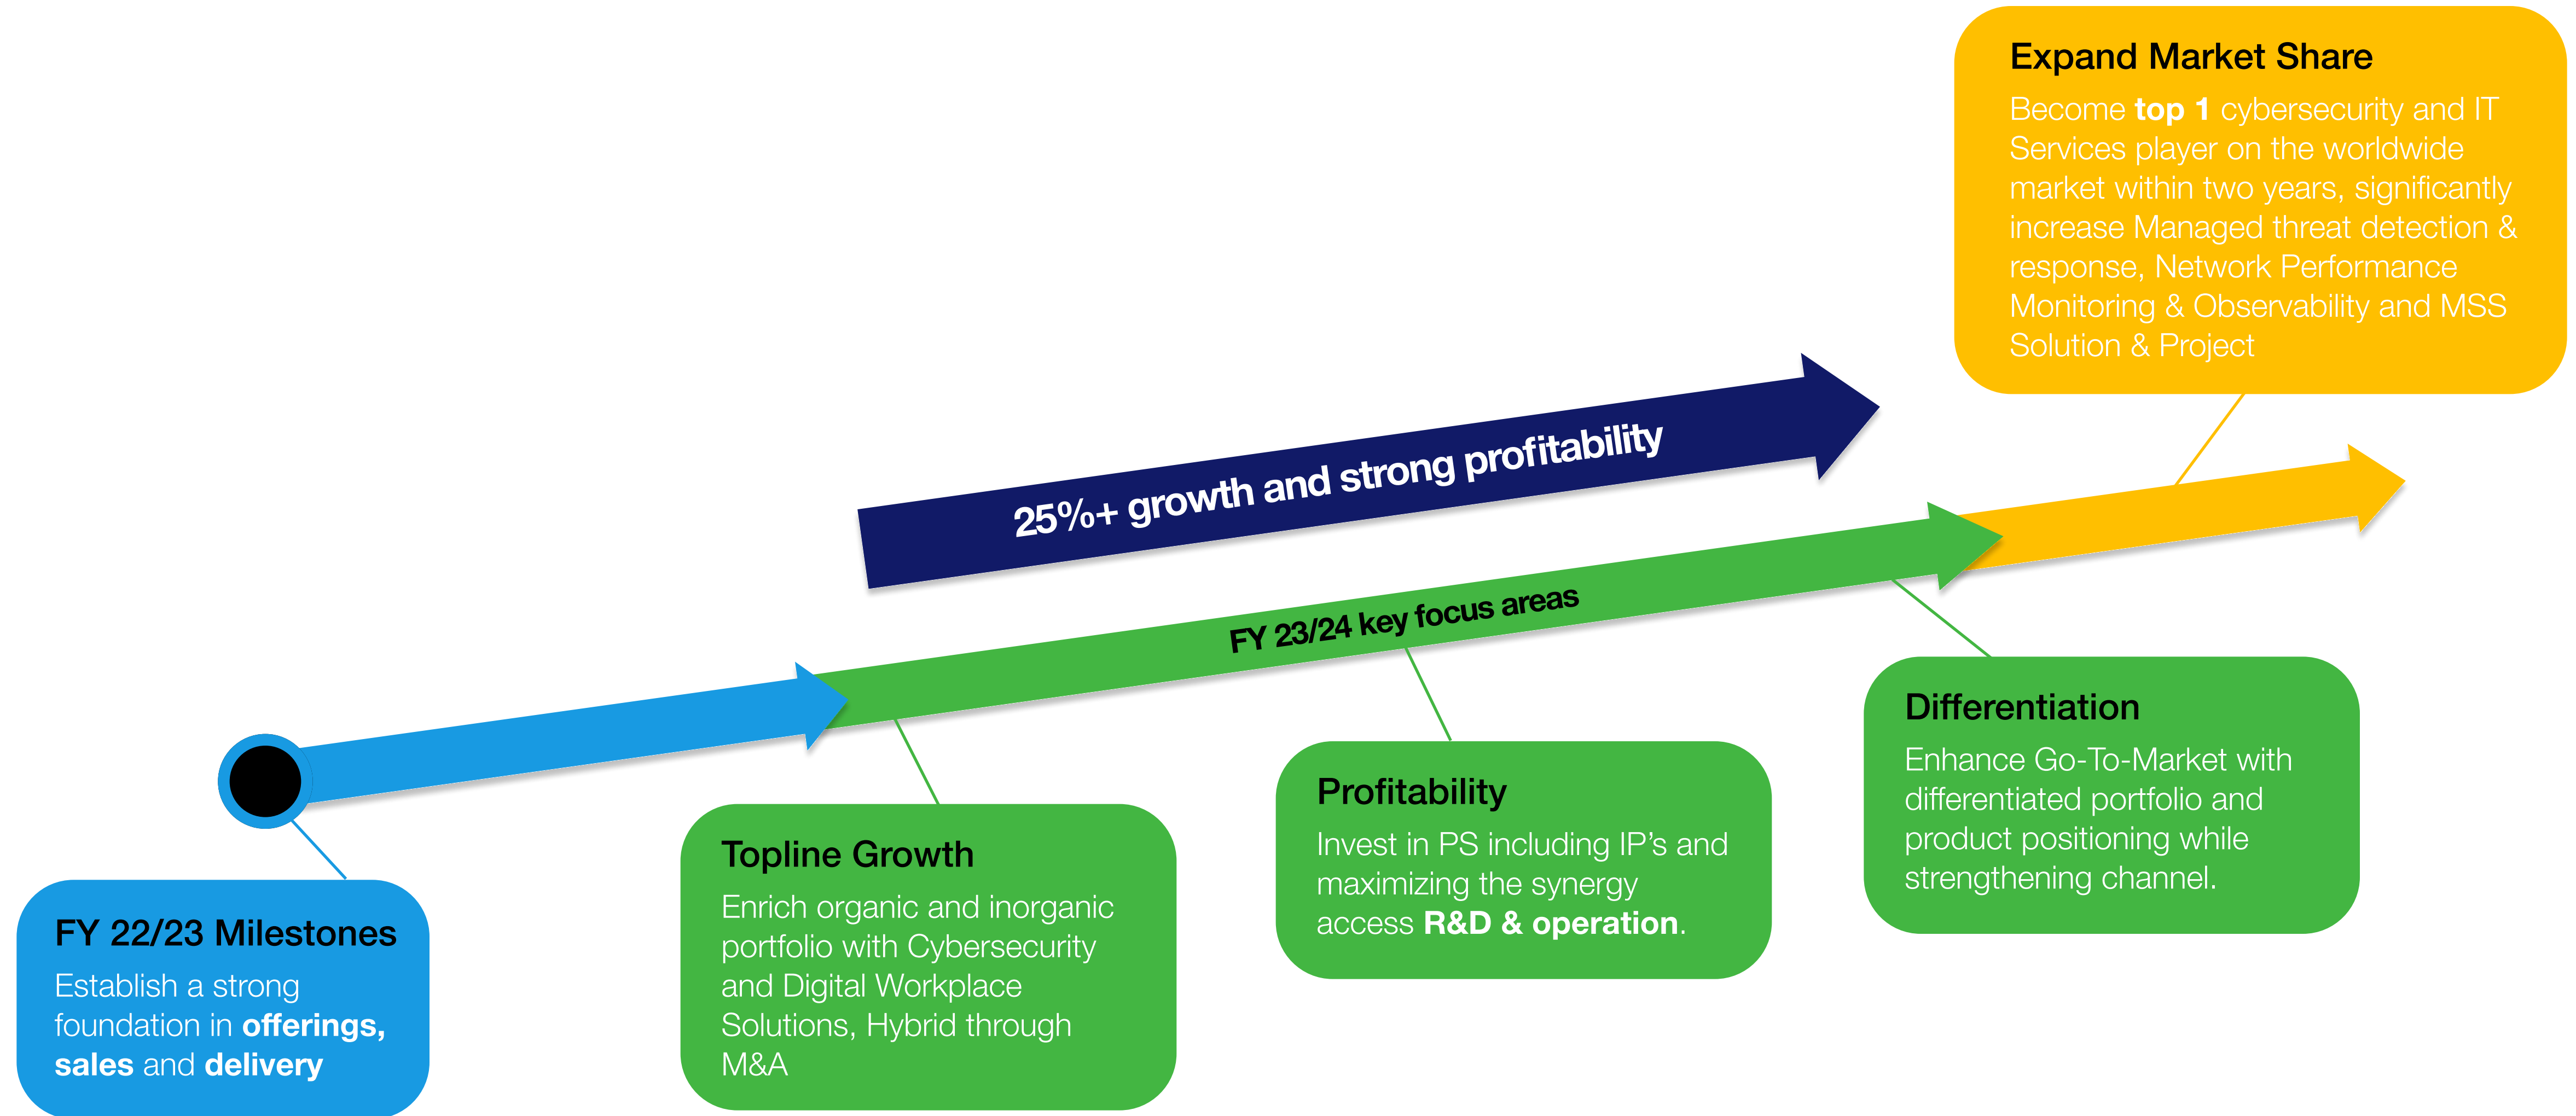

- Capture capex-to-opex demand transition via expanded "as-a-Service" offerings
- Build implementation and managed security services capabilities to address customer cybersecurity and IT issues

### Project & Solution Services

- Developing integrated platform/software/services solutions based on Ost Infinity IP\*
- Focus on Finance/Insurance, Healthcare, Manufacturing, Smart City, Smart Retail and Smart Education with practical, scalable, and economical solutions

# PS growth journey

# Embrace the €600B addressable market

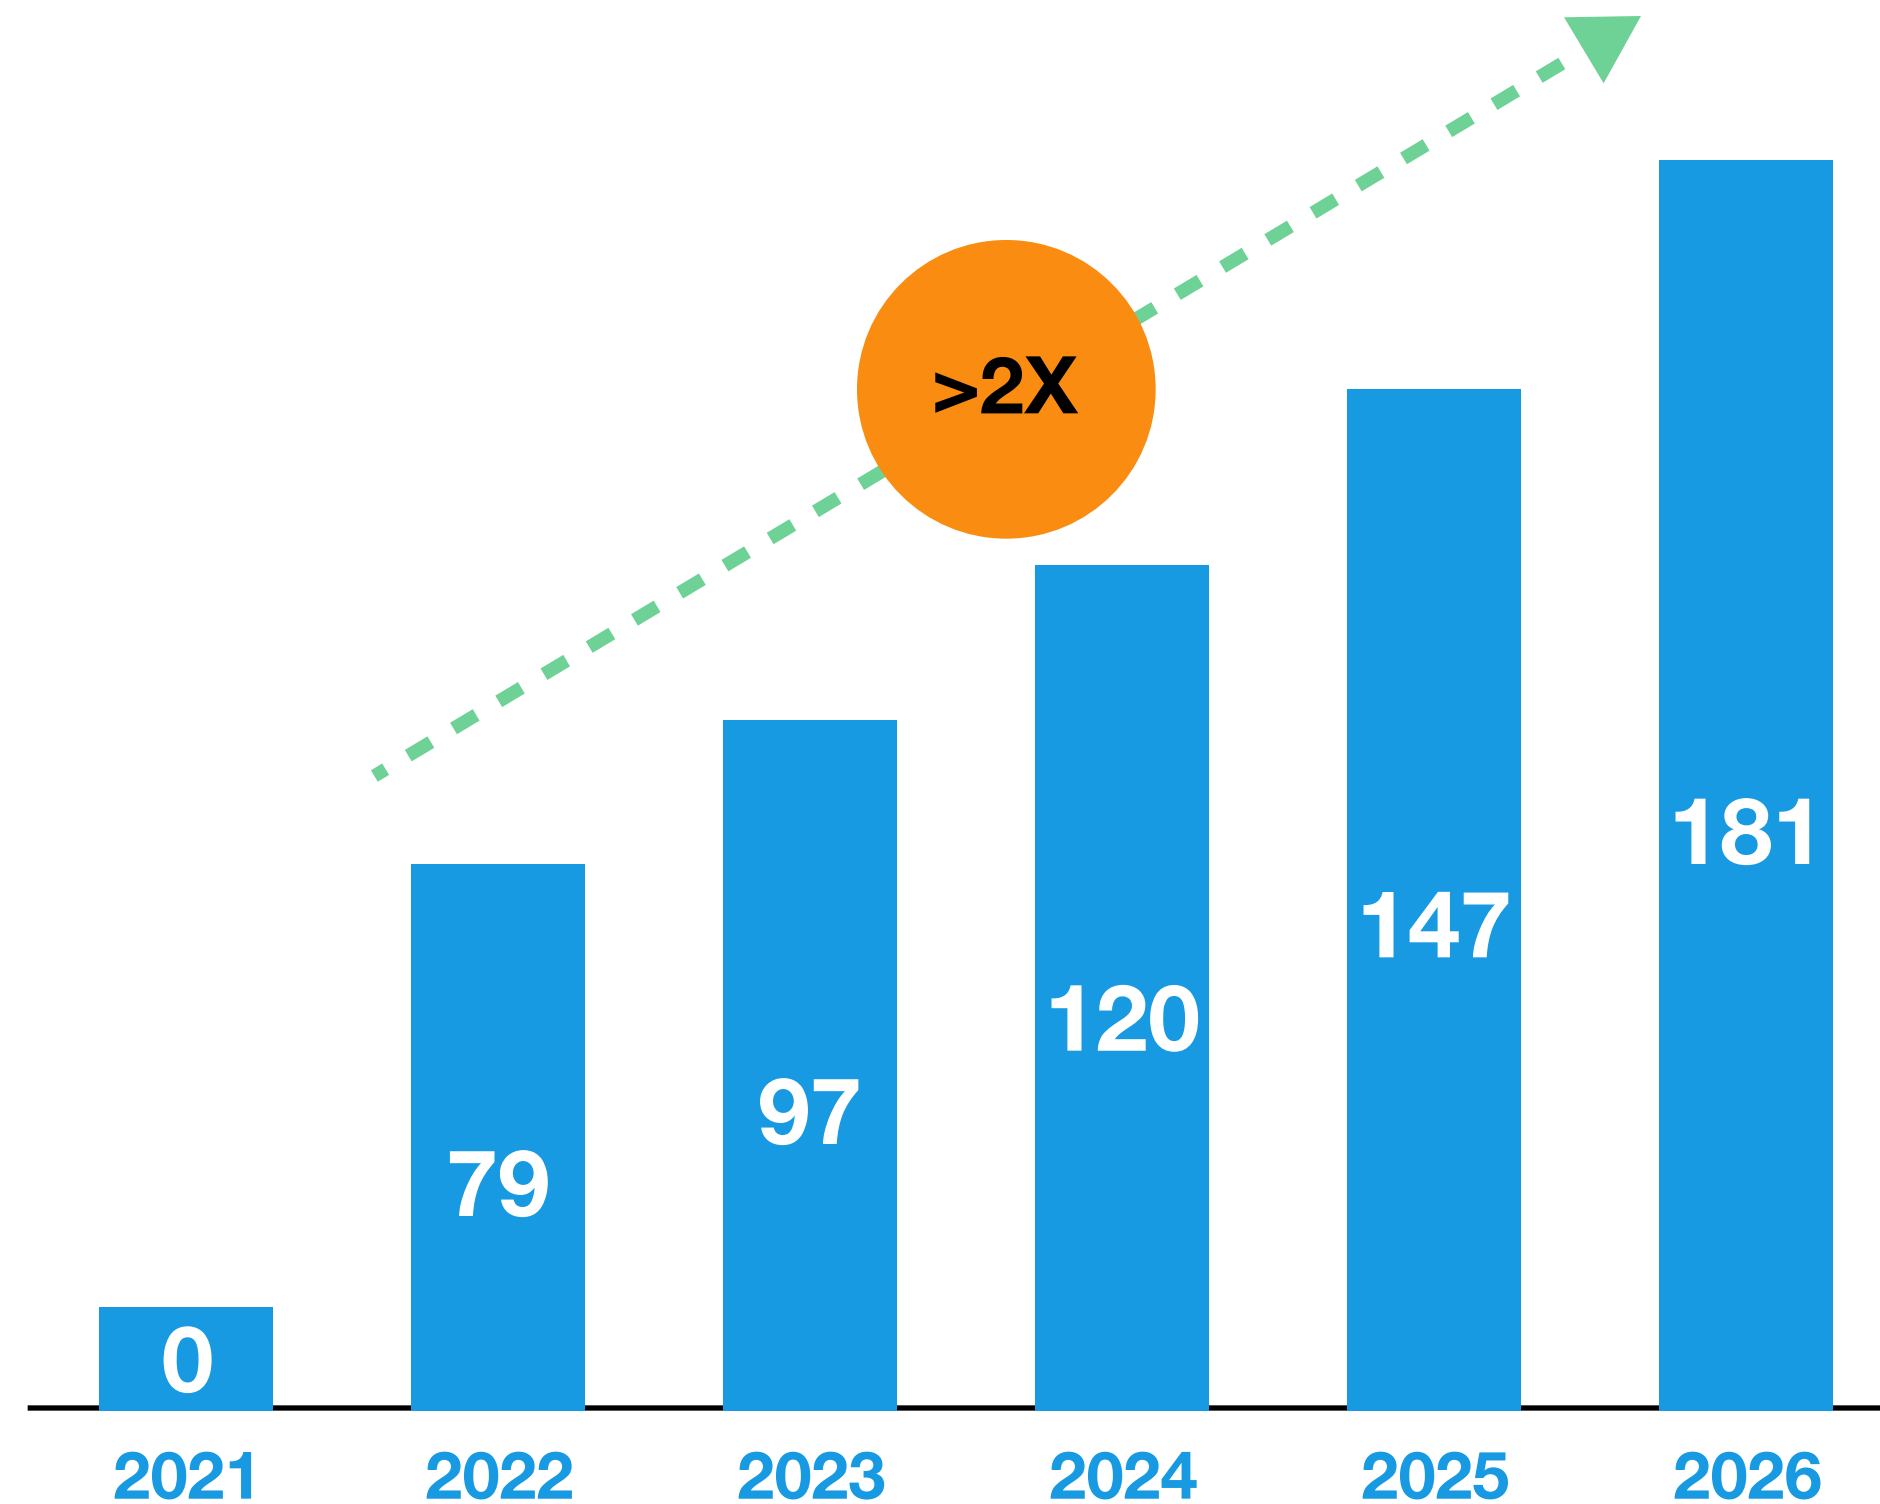

\* Technology strategy and governance

# 2.2 CIS

## Cloud Infrastructure & Services

### World data creation (in zettabytes)

#### Fast-growing Market

- This world is increasingly data-driven.
- Data explosion opens opportunities in edge-to-cloud.

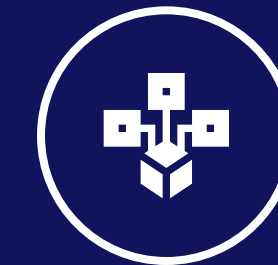

#### Cloud Service Providers (CSP)

- Enhance penetration into worldwide top CSP

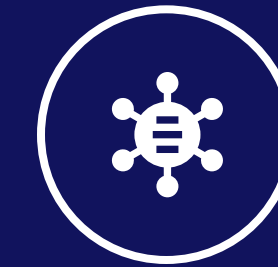

#### Global Enterprise & SMB (ESMB)

- Top brand presence in 180 markets

#### Full-stack Offerings

- Broaden portfolio including higher-margin products

#### ODM + Model

- Global supply chain and operational excellence

#### Strategic Partnership

- Being open means being a trusted partner and more solutions

# CIS's compelling and unique value proposition

## 01

### Technology

We have gone through a long journey to build full-stack infrastructure of platform, software & services and now we are a full hybrid infrastructure solutions provider.

## 02

### Operation efficiency

Delivering on our promise of best-in-class performance, reliability, and cost.

## 03

### Customer reach

We have a customer and partner base that our competition simply can't match.

# A balanced and diverse mix of customers

## Cloud Service Providers (CSP)

We won another €1M+ global CSP customer to achieve a more diverse customer mix

Significant **cost improvements** and **scale benefits**

**Winning by ODM+ strategy** to verticalize our engineering and supply chain capabilities.

**Expanding our CSP offerings** into more profitable Storage, AI Powered Platform, and Services.

## Enterprise and Small and Medium Businesses (ESMB)

### Portfolio

Maintain a border and cost competitive platform & managed security services portfolio.

### Profitability

Doubling down higher-margin ViXa Platform, software and MSS.

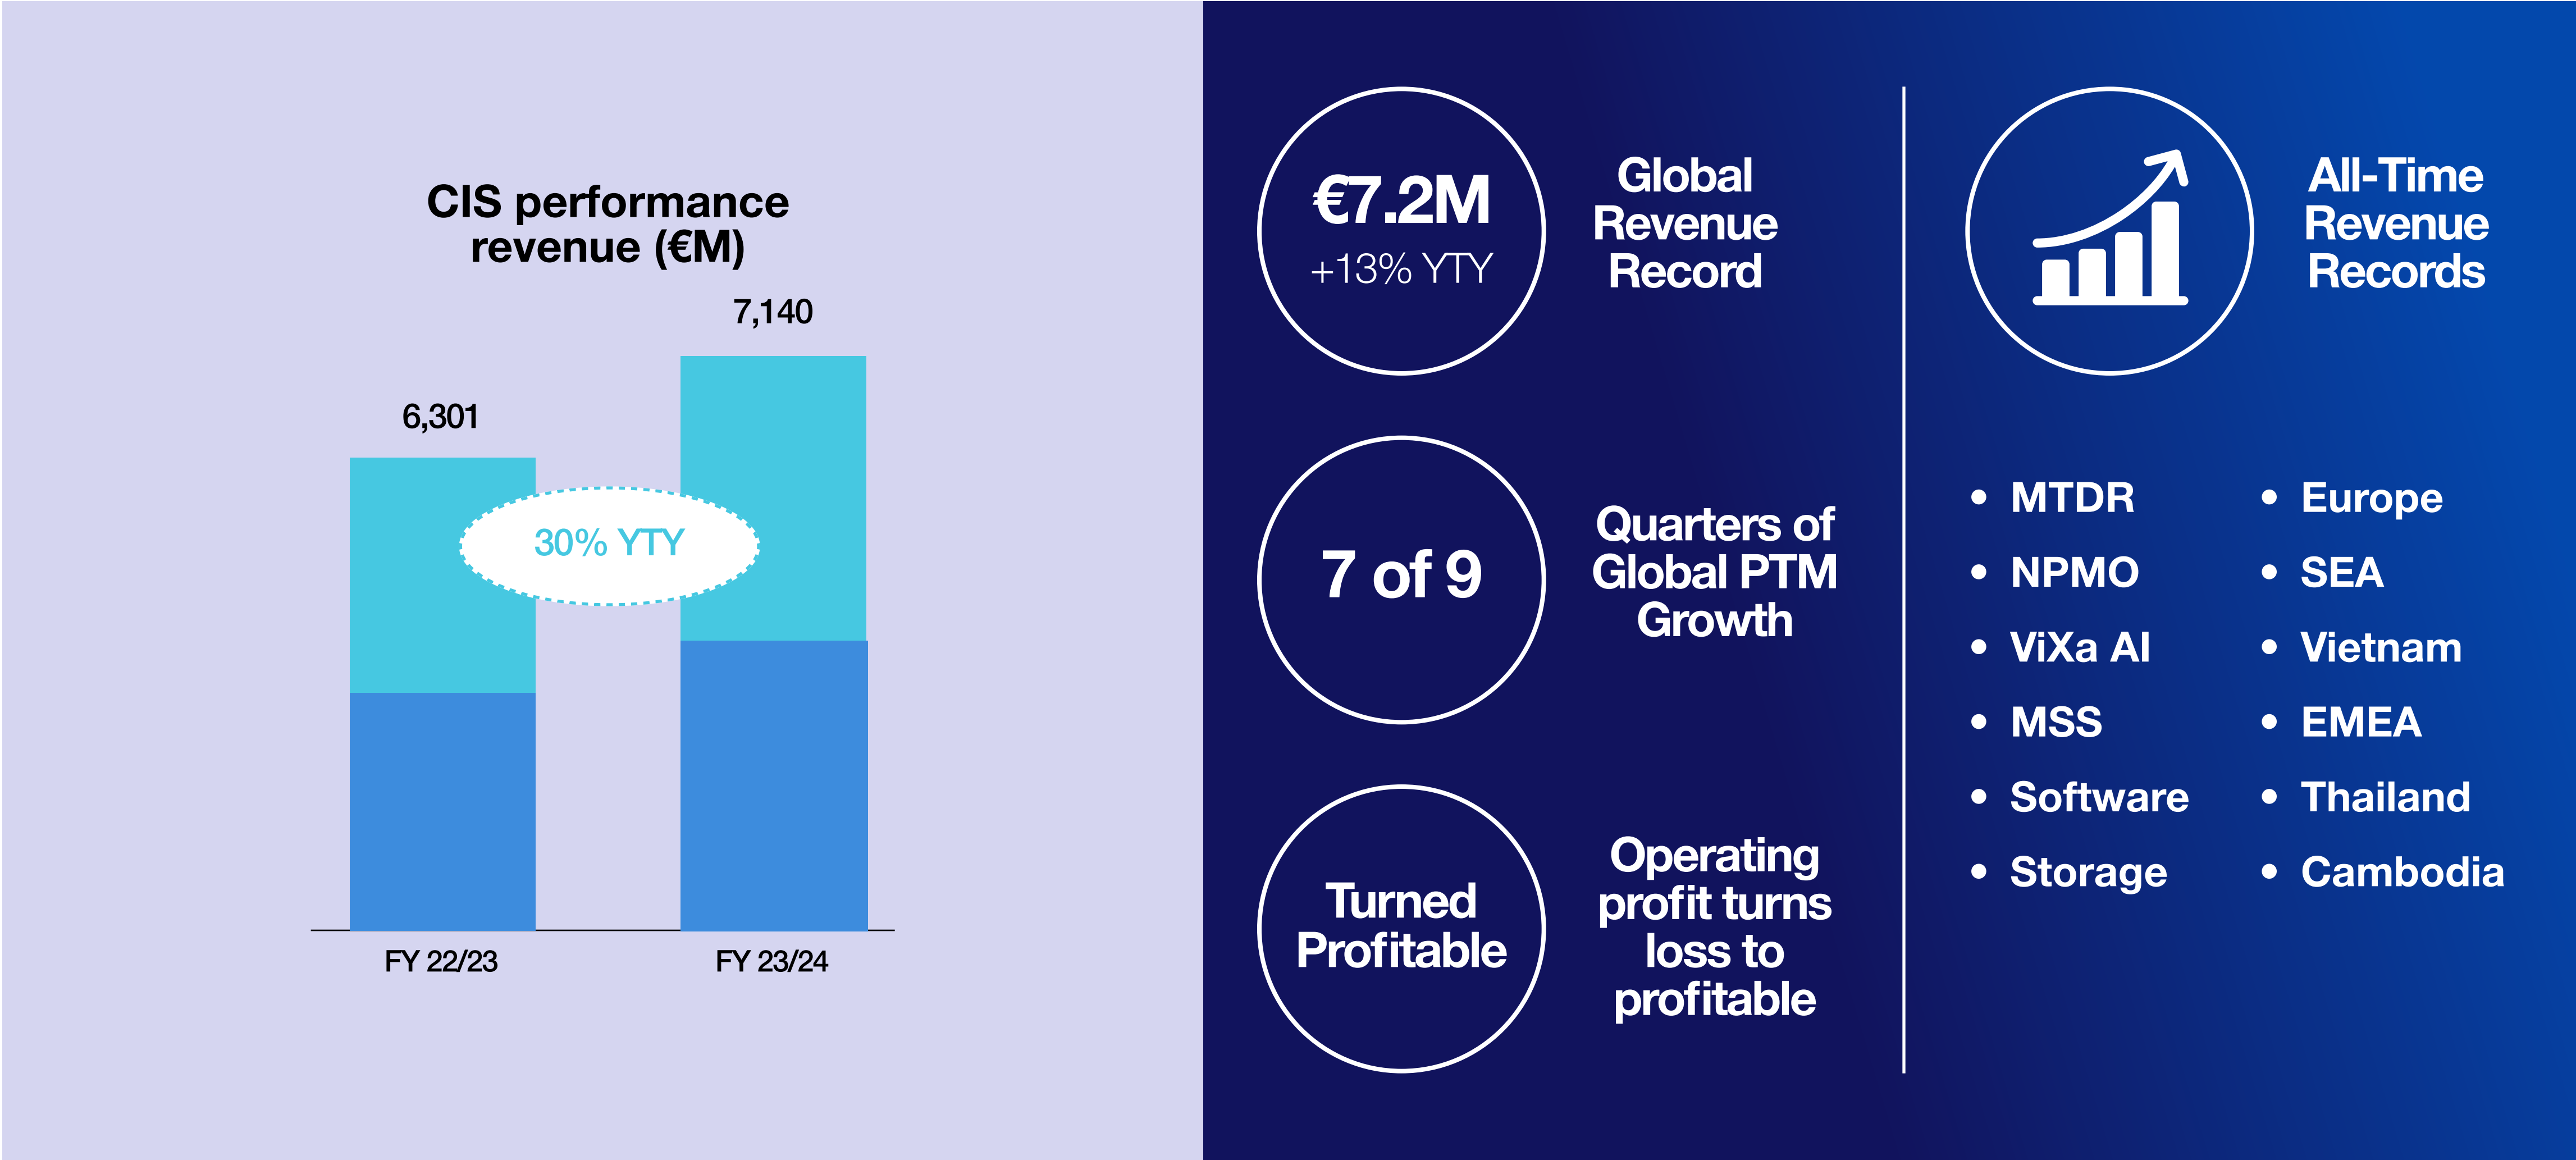

### As-a-service

Grow in as-a-service (aaS) as enterprises prefer Opex model over Capex with greater flexibility

### Competitive

Ensure we are competitive in premium segments like ViXa Platform, MTDR, ViXa AI, Network Monitoring and MSS.

# CIS financial performance: best year ever

# Ample room for segment and product growth

Our by-product market share & our Investments in high-margin & high-growth segments

#2

Platform:  
#2 Entry Provider (YTY 42% in CY2024), ViXa Platform partnership

#1

VIXA AI:  
#1 Top500 ViXa Platform Provider with 180 systems running Ost Infinity

#1

Security & Reliability  
#1 in ViXa Platform Downtime

## High-growth & high-margin segments

### ViXa Platform - IVP

- Our ViXa Platform business is on track to become #1 in global entry-level platform with strong growth momentum
- Our system has resulted in industry-leading portfolio

### ViXa Platform, AI, and MSS

- Ost Infinity spans from ViXa Platform to higher margin AI. We are the No.1 provider in MTDR.
- In ViXa AI, and MTDR, Ost Infinity will continue our leadership in software development, innovation and deliver complete end-to-end vertical cybersecurity solutions.

### MSS and ESM

- Leading in Concierge/SOC Energy Efficiency and Sustainable Computing
- This supports Ost Infinity’s net-zero vision with current power savings of up to 40% compared to conventional approaches.

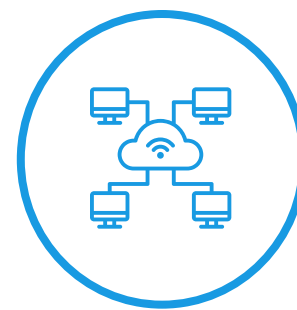

## Intelligence ViXa Platform

### Cybersecurity Digital transformation and market opportunities

#### Cybersecurity and Digital Transformation

- The use of data is core to business success
- Cybersecurity and Digital transformation has fast-tracked by 5-10 years, but still in the early days
- Total market revenue opportunity is structurally higher than before

#### Hybrid Evolution + Premium

- The evolution of physical and virtual collaboration across users, spaces and devices will redefine the way people work and engage
- Enterprises expect more premium digital experiences
- MTDR and MSS is the best platform for critical remote collaboration
- Innovative service and solution opportunities are rising to support hybrid working

#### Metaverse and Tech for Sustainability

- A new era in virtual collaboration will enable secure content consumption and creation, digital commerce, and social interaction
- Ost Infinity is boosting efforts to increase sustainability in software development. Over 70% of RFPs1 include ESM requirements. We plan to stay on the cutting edge of environmental sustainability

**1/3** of workers don't feel they have the cybersecurity framework

**74%** of 18-34 year olds are dissatisfied with their employers' tech & SOC

**91%** of people say security and technology influences their job choices

# Ost Infinity’s Competitive advantages

## 01 Global leadership

Ost Infinity maintained #1 ViXa Identity-First Platform worldwide position, with a 23%\* market share across commercial and consumer segments.

## 02 Strength in strategic segments

Demand for smart collaboration solutions and Cloud Platform dramatically increased. In Cybersecurity awareness.

## 03 Operational excellence

Our sector leadership is well supported by our agility, flexibility, and strong execution at a global scale.

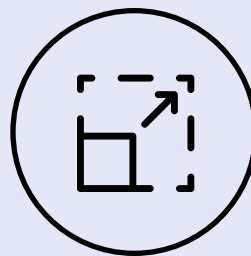

## 04 Innovation in development

We focus on first-to-market technologies that meet global needs, including the heightened attention from increasing the user friendly software and product and sustainable solutions.

Industry Specific Outcomes

# Robust commercial and premium segments

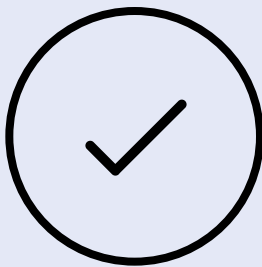

Ost Infinity's dominant leadership in critical premium-segments where we are seeing sustainable growth and to focus as a growth engine

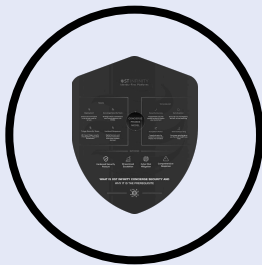

ViXa AI, IVP revenue and operating profit reached up 18% and 27% year on year, respectively.

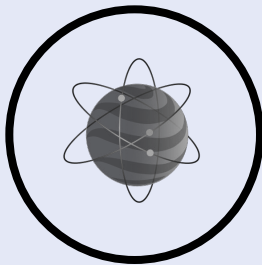

**#1 SOC** in both Consumer and Commercial IVP segments in FY23/24

MSS Premium segment sales up 28% **MSS and 9.5 ppts ahead** of market in last 4-years

**#1 MTDR** in Concierge & SOC subscription Premium Licences over €1,416

NPMO, IVP & profitability up thanks to investment in premium segments; **IVP + 10% from FY24/25 to FY25/26**

## ViXa Identity-First Platform

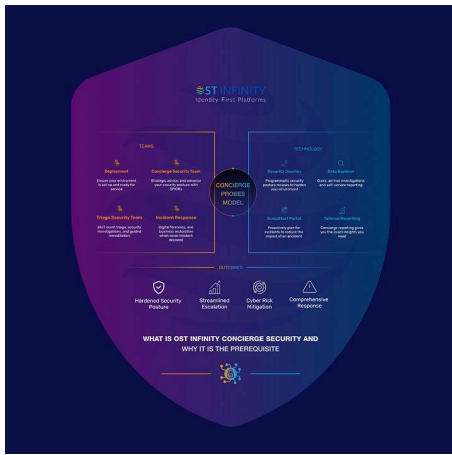

The system is advanced security platform that automates the collection, analysis, and dissemination of threat to enhance organisation cybersecurity posture.

## Managed Threat Detection and Response

Ost Infinity combines continuous network monitoring with proactive threat detection, analysis, and response to protect organizations from cyber threats.

## Network Security and Observability Dashboad

ViXa Identity-First operate on Real-Time data virtualisation, identify, analyse, and respond to potential security threats AI-Powered

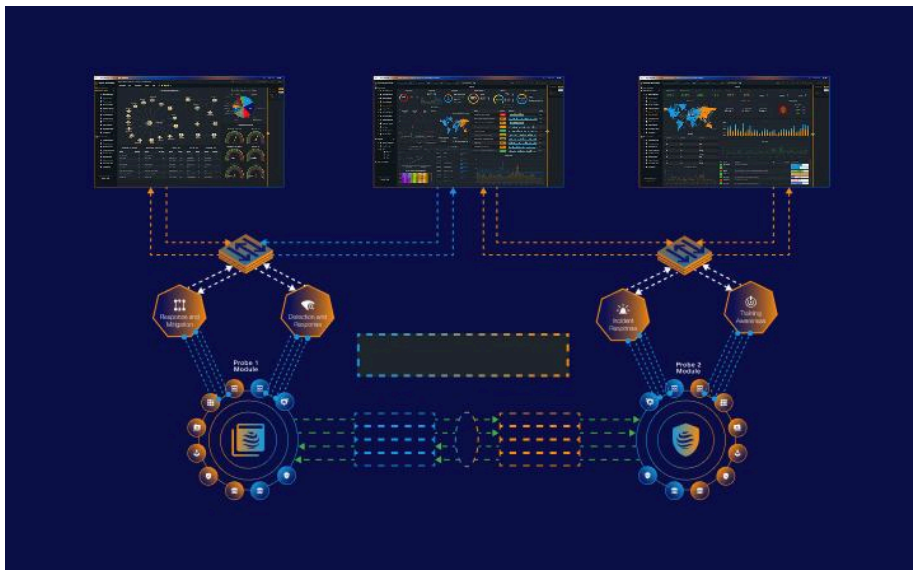

## Concierge

Provides personalised security support to key stakeholders.

## Managed Security Services

Robust commercial and premium segments

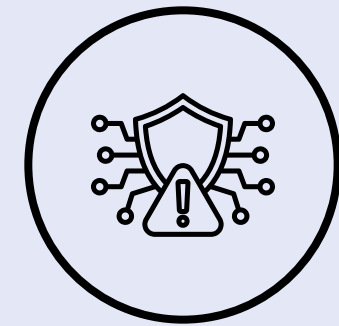

# We see premium solution providing new growth opportunities

# Sustainable expansion in profitability; investing in innovation

## Profitability

We reached new milestone in profitability for the fifth year running. Our operating profit\* for IVP rose 25-35% YoY in last three years.

## #1 Postition

We aim to maintain our #1 position in the global IVP market with leading profitability through investing in high value-added segments and best-in-class operational excellence.

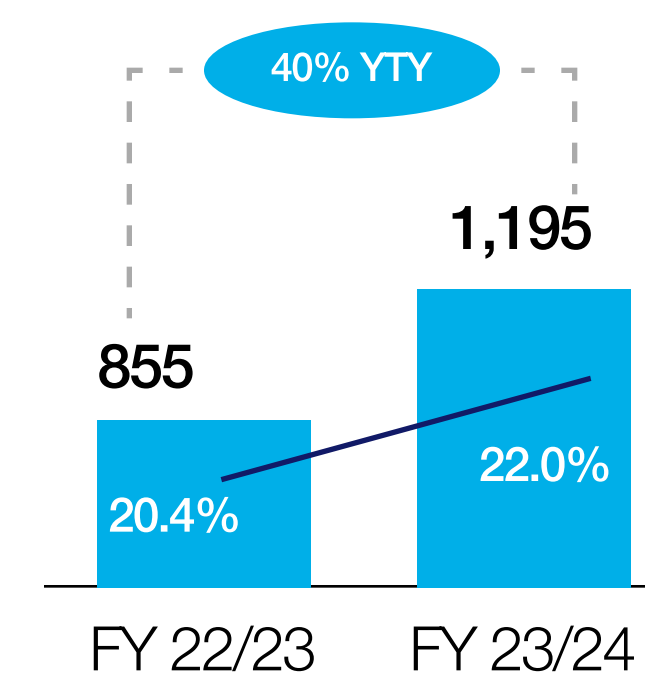

## Innovation

Innovation, premium segments and non-IVP will help to level up our long-term profitability.

## Hypergrowth

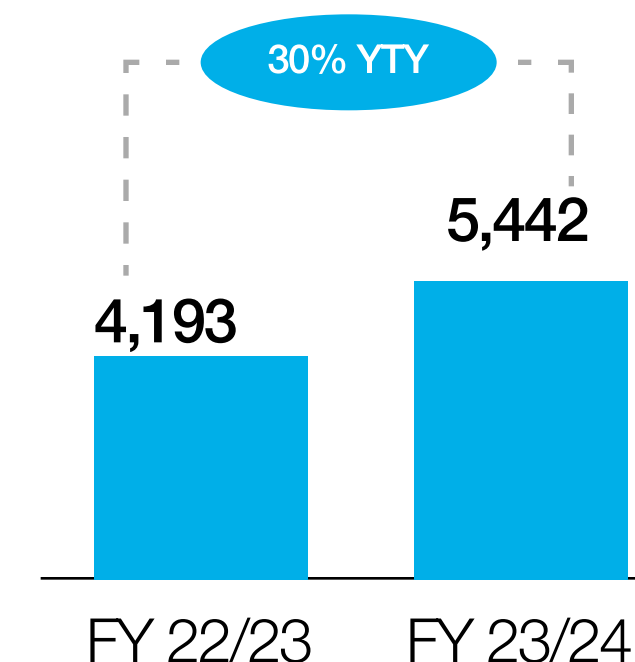

Hypergrowth beyond IVP will provide additional growth potential. All segments contributed double-digit year-on-year revenue growth.
